CLAIMS made immediately on receipt of goods will meet with prompt recognition, and be adjusted if our error. All **SHIPMENTS** travel at **CONSIGNEE'S RISK.**

"COLLECTED PLANTS" are those carefully lifted from open woods, and usually trimmed before shipping. Our true line is in furnishing strong **NURSERY-GROWN** stock, but to meet a demand for very **CHEAP STOCK**, we have carefully prepared a schedule, and a glance shows the price of **COLLECTED** or **NURSERY-GROWN.** **PLEASE ORDER ACCORDINGLY.**

WE SHIP usually from October 1 to December 1, and from March 1 to May 1, often all through the winter, if mild. (**PLEASE ORDER EARLY.**)

OUR SHIPMENTS extend over the world, and our **PACKING** is as nearly perfect as is possible.

LARGE FROST-PROOF CELLAR, PACKING HOUSE and **SHEDS** facilitate prompt shipments, especially in winter, and I would ask my customers to bear this advantage in mind.

PLEASE WRITE US ABOUT ANYTHING—our mountains, climate—but especially about **PLANTS—AMERICAN PLANTS**—and we may interest you. Our facilities are broad and our territory large. And **REMEMBER**, we are the largest growers and collectors of **HARDY NATIVE ORNAMENTALS EXCLUSIVELY** in America.

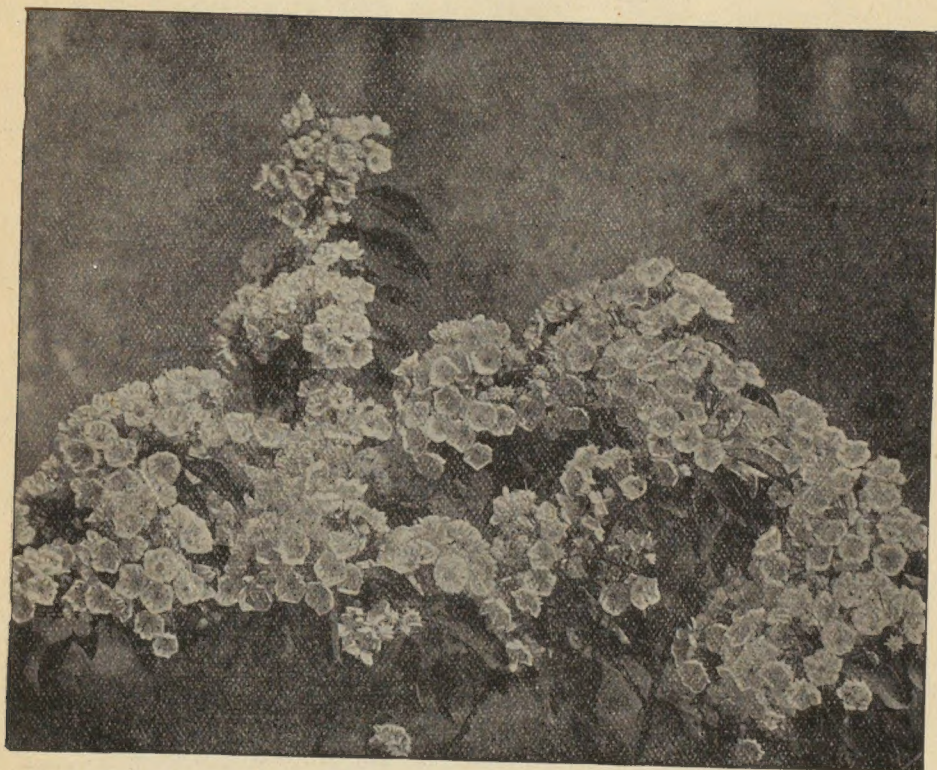

Soil, Planting and Care of Native Plants.

The Azaleas, Rhododendrons, and most other plants herein named are hardy generally throughout the United States, even in the North and Northwest, all of our stock having stood without injury 20 degrees below zero, and, with proper care in preparation of soil and in planting, may be grown successfully. They thrive best in rich, peaty soils and partially shaded situations. **A good soil can be made** by excavating 2 to 3 feet of the surface, and filling with equal parts of good leaf-mold or other decayed vegetable matter and surface loam, with one-tenth or more of sharp sand. Swamp muck or field sod may be used. Mulching (spent tan, moss, leaves, hay, etc.) is always useful, and is necessary where the ground is very dry. Lime, in **large quantities**, in any form, is fatal to Rhododendrons, Azaleas and ericaceous plants in general. As a rule, give the plants a deep soil, with plenty of well-decayed vegetable food and good drainage, and the results will be satisfactory.

Our Location,

At the summit of the Carolina mountains, 3,800 feet toward the clouds, and under the shadow of the great Grandfather Mountain, insures long, cool summers and moderate winters, which are very favorable to the growth of these beautiful native ornamentals, and produce a **hardy stock—an important point with Northern planters.**

For years the Highlands Nursery has been growing and pushing forward **native plants exclusively**, and it is extremely gratifying to us to be made aware of rapidly increasing demand for them, especially in our own country, showing, as it does, that a worthy home product is appreciated by Americans. Constant additions are being made to our already large and varied stock, and our endeavor is that each year we can better serve our patrons.
